UNITY FOODS LIMITED:

Unity Foods Limited aims to provide *food for life*. We transform crops into products that serve the vital global needs in food sector of the growing world. We have diversified our business portfolio to operate in various agro product mix for a global breadbasket, handling various agro commodities to connect them from farm to dining table, from where they are grown to our customers' doorstep. Our products include Edible Oil, Industrial Fats, Flour, and various feed ingredients for poultry, livestock and aqua sector. Being innovative, we provide customized solutions to industries handling food and feed products to enhance their performance and profitability.

What is Soya Pellets?

Pure Soya Pellets are an excellent source of protein for livestock feed. Pure Soya pellets are full of amino acids which is also very important to enhance the milk production. These pellets have a low lignin content and very high digestibility making it an ideal ingredient for the feed.

Pure Soya Pellets are coupled with a very low non-structural carbohydrate content which makes this product a particularly good energy and fiber source, resulting in a highly favorable rumen fermentation pattern.

PURE SOYBEAN MEAL Competitive advantages over others:

PURE Soybean Meal made from US soybeans, considered the best in nutritional value.

- Consistent quality of the protein and nutritive value
- Higher essential Amino acid content per unit of crude protein
- Better uniformity
- Higher soluble sugars
- Higher Fat, Sucrose and Stachyose
- Higher KOH protein solubility
- Higher protein dispersibility index

PURE SOYA PELLETS Benefits:

- Soya Pellets provide more protein and energy as compare to other oil cakes
- Protein is important for animal's feed to enhance milk, while Soya Pellets are full of proteins enhancing milk production
- Soya Pellets are full of Amino Acids which also increases milk production
- Soyabean Pellets are free from all kind of adulteration
- Increases Milk and Milkfat
- It improves weight of the animal

Recommended Dosage:

Requirements will differ depending on the current diet. As a guide, introduce slowly to adult dairy cows at 500g per day, increases to a maximum of 6 kg per cow per day. Can be fed in silos with care but suitable for feeding on feed pad, mixer wagon and ad-lib. Minerals can be added as required.

Storage:

Store in a dry area, away from bird and rodent infestation.
